- 1 Check using the Parts List that none of the components are missing.
- 2 Plan the final position of the play equipment ensuring there is sufficient space.
- 3 Stainless steel slides should face north or be shaded to prevent over heating. Slide runouts should be inclined downwards by approximately 2 degrees for drainage purposes.
- 4 Excavate the foundation holes in accordance with the plan.
- 5 Sort and identify parts before assembly. Each leg is numbered to correspond with the foundation plan.
- 6 Position 2 off 300 long spragging irons into the hoes provided in each post upright and stand in the foundation holes. Assemble the decks at the positions marked on the posts. Do not tighten the fixing bolts until all the activities have been assembled.
- 7 Assemble the activities onto the posts. Leave fixing bolts loose until all the activities have been assembled.
- 8 Fill the foundation holes to the required depth with concrete.
- 9 Do not allow the equipment to be used until the concrete has set (2 - 3 days) and the required safety surfacing has been installed.
- 10 Tighten all fixing bolts.
- 11 Follow the maintenance instructions supplied.

During installation care must be taken to prevent hazards to children.  
Care should be taken if conditions are abnormal.
