- 1 Read all instructions carefully before starting the assembly.
- 2 Check using the parts list and fixing kit list that none of the components are missing. If any parts are missing contact our Sales Office.
- 3 Plan the final position of the play equipment ensuring there is sufficient space. See the ground plan for recommended safety surfacing area and critical fall heights to EN1176.
- 4 Excavate the foundation holes in accordance with the plan. Orchard is designed to be installed onto a level site.
- 5 Fit the ground fixings OPA002 to the bottom of the relevant logs, following the instruction sheet on page 04.
- 6 Erect the main logs into the foundation holes using the ground plan for reference. Each log is numbered at the top, and marked at the base with an X.
- 7 Assemble the activities to the logs prior to concreting into position.
- 8 When all the activities are fitted, fill the foundation holes to the required depth with concrete.
- 9 Do not allow the equipment to be used until the concrete has set (2 - 3 days) and the required safety surfacing has been installed.
- 10 Check that all fixing bolts are fully tightened. Fit the post caps following the instruction sheet on page 04.
- 11 After one month check all bolts and tighten if necessary. After this one month period insert the rubber log plugs as described on the instruction sheets page 05 and 06.
- 12 Follow the maintenance instructions supplied.

During installation care must be taken to prevent hazards to children.
Care should be taken if conditions are abnormal.
